DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/03/2013
Number of Days to Update: 45

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

GEOCHECK® - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

ANDERSON
NOT REPORTED
ANDERSON, CA 96007

TARGET PROPERTY COORDINATES

Latitude (North): 40.455476 - 40° 27' 19.71"
Longitude (West): 122.299705 - 122° 17' 58.94"
Universal Tranverse Mercator: Zone 10
UTM X (Meters): 559379.8
UTM Y (Meters): 4478337.0
Elevation: 421 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5605366 COTTONWOOD, CA
Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06089C1935G	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06089C1930G	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
COTTONWOOD	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
7	1/2 - 1 Mile East	Not Reported

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Wet alluvial land

Soil Surface Texture: clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 107 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: Min:
2	9 inches	59 inches	stratified loam to clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 4 Min: 1.4	Max: Min:

Soil Map ID: 2

Soil Component Name: Reiff

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 6.5 Min: 5.6
2	18 inches	61 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 42 Min: 14	Max: 7.3 Min: 6.1

Soil Map ID: 3

Soil Component Name: Reiff

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Map ID: 5

Soil Component Name: Reiff

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless

EXECUTIVE SUMMARY

information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 02/07/2017 has revealed that there is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
SHORT'S SCRAP IRON A	2041 GIRVAN RD	NE 1/4 - 1/2 (0.299 mi.)	C13	38

State- and tribal - equivalent NPL

RESPONSE: Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

A review of the RESPONSE list, as provided by EDR, has revealed that there is 1 RESPONSE site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/30/2017 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

Local Lists of Hazardous waste / Contaminated Sites

HIST Cal-Sites: Formerly known as ASPIS, this database contains both known and potential hazardous substance sites. The source is the California Department of Toxic Substance Control. No longer updated by the state agency. It has been replaced by ENVIROSTOR.

A review of the HIST Cal-Sites list, as provided by EDR, and dated 08/08/2005 has revealed that there is 1 HIST Cal-Sites site within approximately 1 mile of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/04/2017 has revealed that there is 1 FINDS site within approximately 0.001 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
REDDING RANCHERIA	2000 REDDING RANCHER	0 - 1/8 (0.000 mi.)	1	8

ECHO: ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

A review of the ECHO list, as provided by EDR, and dated 03/19/2017 has revealed that there is 1 ECHO site within approximately 0.001 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
REDDING RANCHERIA	2000 REDDING RANCHER	0 - 1/8 (0.000 mi.)	1	8

Cortese: The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

A review of the Cortese list, as provided by EDR, and dated 12/28/2016 has revealed that there is 1 Cortese site within approximately 0.5 miles of the target property.

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there are 4 CUPA Listings sites within approximately 0.25 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Background Info: Since 1973, Short's Scrap Iron & Metal has performed aluminum and iron recycling, scrap metal salvaging, and until 1984, automobile crushing. The site consists of a 12-acre rectangular area south of Girvan Road, 4 miles south of Redding. There are a number of large warehouses, office buildings, and outbuildings. A rail spur transects the site from the northwest corner of the property to the middle of the east side of the site. A furnace is used to remelt scrap aluminum on the west side of the property just south of the rail spur. Aluminum waiting to be recycled is piled in the vicinity of the furnace, and ash from the furnace is currently stockpiled in the southeastern portion of the site. There are PG&E gas pipelines and water main pipeline rights-of-way along the east side of the facility. A sump, concrete-lined collection pond, and concrete wash pad are located near the center of the facility. In addition, there is a hazardous waste storage area, three tank storage areas, an aluminum ash pile, a lead contaminated soil pile, transfer storage area, and an historic battery shop area. In 1987, fuel contamination in the soil was

1000369836

discovered from an area around an underground storage tank (UST). The UST was removed and 8000 tons of soil with total petroleum hydrocarbon concentrations as high as 2000 ppm were excavated. Three groundwater monitoring wells were installed in April 1998 and tested for hydrocarbon constituents.

Low levels of toluene, total xylenes, and total petroleum hydrocarbons were detected in the shallow groundwater. These wells no longer remain onsite.

In August-September 1992, RWQCB recommended to the Shasta County Planning Department that the permit for the Automobile Shredder not be issued until the shredder pad area is fully investigated and necessary cleanup completed. In addition, RWQCB dictated that the investigation must encompass the entire facility, but may be incorporated in a phase approach beginning with the area planned for the new auto shredder.

In October 1992, Short submitted a Workplan as part of a phased approach to RWQCB. In February 1993, Short performed field work IAW workplan and addendums. Three groundwater monitoring wells were installed. In May 1993, a Phase I SI Report was submitted to RWQCB. In July 1993, RWQCB described to Short soils contaminated with lead, motor oil, and total phthalates at varying depths with instructions to submit a detailed workplan for remediation.

In October 1996, a PEA workplan was approved by DTSC. In January 1997, following a precipitation event, five stormwater samples were collected from runoff which is generally conveyed to Clear Creek approximately 200 feet south of the site. In March 1997, soil samples were collected across the site. In April 1997, eight wells, in addition to two of the three wells installed previously in 1993, were sampled in May and again in July 1997. Stormwater sample results detected the presence of TSS, TPH, and metals in the runoff. A Stormwater Pollution Plan was submitted to RWQCB in February 1997 outlining steps to be taken to reduce discharges to Clear Creek. Groundwater sampling results did not detect VOCs or SVOCs. Arsenic, chromium, copper, zinc, aluminum, barium, iron, and manganese were the metals detected in groundwater samples. The levels were below MCLs and the facility was directed to continue quarterly groundwater monitoring for a period of one year. Soil sample results revealed lead concentrations exceeding 130 mg/kg from two piles, scrap iron storage area, truck parking area, and the railroad spur. Highest level was 6500 mg/kg. TPH in excess of 1000 mg/kg were found in soil samples from the scrap iron, shop sump, and truck parking storage areas. In October 1997, a PEA report was approved. Short's was requested to enter into a Voluntary Cleanup Agreement for additional work in January 1998.

Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

File Location: Regional Board
Potential Media Affected: Aquifer used for drinking water supply, Contaminated Surface / Structure, Sediments, Soil, Surface water, Under Investigation
Potential Contaminants of Concern: Copper, Lead, Other Metal, Diesel, Waste Oil / Motor / Hydraulic / Lubricating
Site History: The Discharger began shredding appliances in 2011. The appliance shredder waste (fluff and fines) was characterized and classified as hazardous waste due to elevated metal and PCB concentrations. Further investigation of this facility found that storm water discharges from the site contained high concentrations of metals, petroleum, and sediment. CAO No. R5-2012-0706 was issued to the Discharger on in April 2012 and required removal of stockpiled shredder waste, submittal of a PEA, submittal of a shredder waste operations plan, submittal of design and operations plan for upgrading the storm water

treatment system, and removal buried ash from the aluminum remelt furnace. During fall 2012, the Discharger installed a storm water advanced treatment system to treat storm water with flocculent before discharging it off-site. The Discharger is also proposing to excavated buried wastes that may pose a threat to water quality and to install a groundwater monitoring system around the facility.

Agency Type: Private
SIC Code: 2951
SIC Code 2: Not reported
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Primary Waste: STORMS
Waste Type2: Not reported
Waste2: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date Made Active in Reports: 05/12/2017	Last EDR Contact: 04/21/2017
Number of Days to Update: 21	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/05/2017	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/07/2017	Source: EPA
Date Data Arrived at EDR: 04/19/2017	Telephone: 800-424-9346

Number of Days to Update: 16	Next Scheduled EDR Contact: 07/31/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 02/07/2017	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/28/2016	Source: Department of the Navy
Date Data Arrived at EDR: 01/04/2017	Telephone: 843-820-7326
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 05/15/2017
Number of Days to Update: 93	Next Scheduled EDR Contact: 08/28/2017
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/15/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/29/2016	Telephone: 703-603-0695
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 05/31/2017
Number of Days to Update: 66	Next Scheduled EDR Contact: 09/11/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/15/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/29/2016	Telephone: 703-603-0695

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historic Dry Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

---	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Reiff

Soil Surface Texture: gravelly fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	gravelly fine sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 42 Min: 14	Max: 6.5 Min: 5.6
2	18 inches	42 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
3	42 inches	59 inches	stratified loamy sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: Churn

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	12 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 14 Min: 4	Max: 6 Min: 5.1
2	12 inches	59 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 4 Min: 1.4	Max: 6 Min: 5.1

Soil Map ID: 3

Soil Component Name: Water

Soil Surface Texture: gravelly loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

Soil Map ID: 4

Soil Component Name: Perkins

Soil Surface Texture: gravelly loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	gravelly loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 14 Min: 4	Max: 6.5 Min: 5.6
2	9 inches	59 inches	gravelly clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 1.4 Min: 0.42	Max: 6.5 Min: 5.6

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 5

Soil Component Name: Gravel pits

Soil Surface Texture: extremely gravelly sand

Hydrologic Group: Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.

Soil Drainage Class: Excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	extremely gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean Gravels, Well-graded gravel.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	extremely gravelly sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel.	Max: 141 Min: 42	Max: Min:

Soil Map ID: 6

Soil Component Name: Reiff

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 6.5 Min: 5.6
2	18 inches	42 inches	stratified sandy loam to loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1
3	42 inches	59 inches	stratified loamy sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 42 Min: 14	Max: 7.3 Min: 6.1

Soil Map ID: 7

Soil Component Name: Anderson

Soil Surface Texture: gravelly sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Somewhat excessively drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

CALEEMOD INPUT FILES

CalEEMod Inputs

Redding Rancheria Fee-to-Trust and Casino Project
Alternative A

Project-Specific Inputs for the Redding Rancheria Fee-to-Trust and Casino Project

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Project Name	Project Name	Redding Rancheria FTT and Casino Project – Alternative A	Project Description
Project Location	County	Shasta County	Modeler, based on location
Climate zone	Climate Zone Number	3	Appendix F Climate Zones Lookup
Land Use Setting	Urban or Rural	Urban	Modeler, based on location
Start of Construction	Date	July 1, 2019	Project Description
Operational Year	1st year of operation after full buildout.	2025	Project Description
Utility Company	Utility Company Name	PG&E	Project is served by Redding Electrical Utility (REU) which is not included as a power provider in CalEEMod. PG&E is used in place because REU sells power into the PG&E grid and vice versa.
Land Use Type and Subtype	Residential, Commercial, Recreation, etc.	See Table 1.	See Table 1.
Unit Amount	Size of Buildings or Number of units for each Land Use Type.	See Table 1.	See Table 1.
Lot Acreage	Acreage of each Land Use Type	See Table 1.	See Table 1.
Population	Population based on persons/household	0	No residential units are proposed therefore no population is associated with Alternative A.
Construction Phases	Type of construction phase (Demo, Site Prep, etc.) and beginning and ending dates	See Table 2.	See Table 2.
Off-Road Equipment	Type of equipment (Excavator, Dozer, etc.) and number of units per construction phase	See Table 2.	See Table 2.
Dust From Material Movement	Export/Import of Material (Tons or Cubic Yards)	0	Section 2 of the EIS
Demolition	Sq ft or tons of Demo	N/A	--
Construction Trips	Average number of one-way trips per day	--	---
Operational Trip Reductions	% reduction in trips.	See Table 3.	2017 KH Traffic Impact Analysis.

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Operational Trip Gen Rate and trip length	Trips and trip lengths	See Table 3.	See Table 3.
Area Sources	Hearths – # of wood-burning fireplaces, #of gas fireplaces, and # of units with no fireplace.	Not Applicable	No hearths are included in the project design.
	Landscape Equipment - % of equipment that is electric.	-	-
Energy Use	Project Specific Emission Factors.	See Table 4.	See Table 4.
Water and Wastewater	Indoor and outdoor water use for each Land Use Subtype in gallons per year.	See Table 6.	Water and Wastewater Feasibility Study Table 4
Solid waste	Tons of solid waste generated per year	1,292	CalRecycle, 2017
	Land Fill Gas Capture Rate	94%	CARB Mandatory Reporting Regulation Guidance
Operational off-road equipment	Excavator, Dozer, etc.	--	--
Stationary Sources	Emergency Generators/Fire Pumps	3 - 2,923 Horsepower	Based on like project emergency gen/set size and use.
	Generators/Fire Pumps EF	Default	Default
	Process Boilers	3 - 0.5 MMBtu/hr	Estimate from like projects
	Boilers EF	Default	Default
	User Defined	Default	Default
Land Use Change	Vegetation land use type (cropland, etc.) and initial and final acreage	Grassland Initial: 232 Acres Final: 139	Project Description
Sequestration	Type and net number of new trees added	--	--

Source: CalEEMod, 2016; EPA, 2017; Water and Wastewater Feasibility Study, Table 4.

Project-Mitigation Inputs for the Redding Rancheria Fee-to-Trust and Casino Project

Mitigation Input Category	CAPCOA Mitigation Number	Include in Model? (yes/no)	Type of Input / Unit	Project Specific Inputs	
				Inputs	Source/Notes
Off-Road Equipment	C-1	Yes	Engine Type, DPF Level, and Oxidation Catalyst	See Table 5.	See Table 5.
Soil Stabilizer for Unpaved Roads	N/A	Yes	PM10 (% Reduction)	10%	Default % Reduction.
	N/A		PM2.5 (% Reduction)	10%	Default % Reduction.
Water Exposed Area	N/A	Yes	Frequency (per day)	2 times per day	Default % Reduction
	N/A		PM10 (% Reduction)	55%	Default % Reduction.
	N/A		PM2.5 (% Reduction)	55%	Default % Reduction.
Replace Ground Cover of Area Disturbed	N/A	No	PM10 (% Reduction)	--	--
	N/A		PM2.5 (% Reduction)	--	--
Unpaved Road Mitigation	N/A	No	Moisture Content (%)	--	--
	N/A	Yes	Vehicle Speed (mph)	15 mph	Default Reduction
Type of Residential	N/A	No	Type of Residential	--	--
Increased Density	LUT-1	No	Dwelling Units/Acre	--	--
			Job/Job Acre	--	--
Increased Diversity	LUT-3	No	Yes or No	--	--
Improved Walkability Design	LUT-9	No	Intersections/Square Miles	--	--
Improve Destination Accessibility	LUT-4	No	Distance to Downtown/Job Ctr	--	--
Increased Transit Accessibility	LUT-5	No	Average Distance to Transit Station (miles)	--	--
Integrated Below Market Rate Housing	LUT-6	No	# Dwelling Units Below Market Rate	--	--
Improve Pedestrian Network	SDT-1	No	Yes or No; Project Site, Project Site and Connecting off-site, and Rural	--	--
Provide Traffic Calming Measures	SDT-2	No	% Streets with Improvement	--	--
		No	% Intersections with Improvement	--	--

Mitigation Input Category	CAPCOA Mitigation Number	Include in Model? (yes/no)	Type of Input / Unit	Project Specific Inputs	
				Inputs	Source/Notes
Implement Neighborhood Electric Vehicle (NEV) Network	SDT-3	No	% of streets equipped with NEV network.	--	--
Limit Parking Supply	PDT-1	No	% Reduction in Spaces	--	--
Unbundled Parking Costs	PDT-2	No	Monthly Parking Costs (\$)	--	--
On-Street Market Pricing	PDT-3	No	% Increase in Price	--	--
Provide a Bus Rapid Transit System	TST-1	No	% Lines BRT	--	Assuming no increase over existing shuttle services
Expand Transit Network	TST-3	Yes	% Increase Transit Coverage	--	--
Increase Transit Frequency	TST-4	No	Level of Implementation	--	--
		No	% Reduction in Headways	--	--
Implement Trip Reduction Program	TRT-1, TRT-2	No	% employee eligible	--	--
		No	Program Type	--	--
Transit Subsidy	TRT-4	No	% employee eligible	--	--
		No	Daily Transit Subsidy Amount (\$)	--	--
Implement Employee Parking "Cash-Out"	TRT-15	No	% employee eligible	--	--
Workplace Parking Charge	TRT-14	No	% employee eligible	--	--
		No	Daily Parking Charge (\$)	--	--
Encourage Telecommuting and Alternative Work Schedules	TRT-6	No	% employee work 9/80	--	--
		No	% employee work 4/40	--	--
		No	% employee telecommute 1.5 days	--	--
Market Commute Trip Reduction Option	TRT-7	No	% employee eligible	--	--

Mitigation Input Category	CAPCOA Mitigation Number	Include in Model? (yes/no)	Type of Input / Unit	Project Specific Inputs	
				Inputs	Source/Notes
Employee Vanpool/Shuttle	TRT-11	Yes	% employee eligible	--	--
		Yes	% vanpool mode share	--	--
Provide Ride Sharing Program	TRT-3	No	% employee eligible	--	--
Implement School Bus Program	TRT-13	No	% family using	--	--
Only Natural Gas Hearth	N/A	No	Yes or No	--	--
No hearth	N/A	No	Yes or No	--	--
Use of Low VOC Cleaning Supplies	N/A	No	Yes or No	--	--
Use low VOC Paint (Residential Interior)	N/A	No	Emission Factor (EF) grams per liter (g/l)	150	SHAAQMD amendment to Rule 3:31 Architectural Coatings (based on Nonflat Coating)
Use low VOC Paint (Residential Exterior)	N/A	No	EF (g/l)	150	SHAAQMD amendment to Rule 3:31 Architectural Coatings (based on Nonflat Coating)
Use low VOC Paint (Non-residential Interior)	N/A	No	EF (g/l)	150	SHAAQMD amendment to Rule 3:31 Architectural Coatings (based on Nonflat Coating)
Use low VOC Paint (Non-residential Exterior)	N/A	No	EF (g/l)	150	SHAAQMD amendment to Rule 3:31 Architectural Coatings (based on Nonflat Coating)
Electric Lawnmower	A-1	No	Percent of equipment type that will be electric.	--	--
Electric Leafblower	A-1	No	Percent of equipment type that will be electric.	--	--
Electric Chainsaw	A-1	No	Percent of equipment type that will be electric.	--	--

Table 1 – Land Use Inputs Alternative A

Land Use Type	Land Use Subtype	Unit Amount	Size Metric	Lot Acreage	Square Feet	Population
Recreation (Casino)	User Defined	150.326	1,000 sq. ft.	4.25	150,326	0
Recreation	Movie Theater (Event Center and outdoor amphitheater)	3,300	seats	2.04	72,000	0
Recreation	Arena (Conference Center)	10.08	1,000 sq. ft.	0.29	10,080	0
Retail	Regional Shopping Center	130	1,000 sq. ft.	3.68	130,000	0
Recreational	Hotel	250	rooms	5.02	177,367	0
Parking	Enclosed Parking Structure	1,650	spaces	16.51	583,500	0
Parking/Water/Wastewater	Parking Lot	600	spaces	60.98	--	0
Total				92.76	1,123,273	

Notes: Population based on daily trips provided by Kimley-Horn. Event center includes 1,800 seats from the Event Cent and 1,500 seats from the outdoor Amphitheatre.

Source: Table 2-1, Section 2 of the EIS.

Table 2 – Construction Equipment Usage

Equipment	Total No.	Construction Phase Activities				
		Site Preparation	Grading	Construction	Paving	Architectural Coating
	Construction Phasing	7/1/2019 - 8/31/2019	9/1/2019 - 11/30/2019	12/1/2019 - 12/15/2020	5/1/2020 - 8/15/2020	3/15/2020 - 12/31/2020
All Construction Equipment	Default	Default	Default	Default	Default	Default
Worker Trips (one-way trips)	--	Default	Default	Default	Default	Default

Notes: Construction phase timing based on similar projects. Total time of construction from Project Description.

Table 3 - Trip Generation Rates

Land Use	Daily Trip Generation Rate		Trip Length (Miles)			Trip Percent			Primary Trip	Diverted
	Weekday (size/day)	Saturday (size/day)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)		
Casino	33.67	33.67	9.50	9.50	25.00	19.0	19.40	61.60	90	10
Events Center	0.23	0.23	9.50	9.50	25.00	1.80	79.20	19.00	100	0
Convention Center	67.01	67.01	9.50	9.50	25.00	0.00	81.00	19.00	100	0
Hotel	2.04	2.04	9.50	9.50	25.00	19.40	61.60	19.00	100	0
Retail	22.52	22.52	9.50	9.50	25.00	16.30	64.70	19.00	90	10

Notes: Kimley-Horn TIS, 2018.

Event and convention center 30 percent trip generation reduction implemented because facilities are anticipated to operate less than 256 days per year.

Table 4 - Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)
All Land Uses	--	13.768	--	--	0.131

Notes: All other land uses energy is input under Casino the land use.

Electricity energy use is determined by the following equation: $15,465,000 \text{ kwh/yr} / 1,123,273 \text{ sqft} = 14.601 \text{ kwh/size/yr}$. Kwh/yr was provided in an email from HBG Design on July 10, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Natural gas use is determined by the following equation: $(16,800 \text{ cf per hour} * 8,760 \text{ hours/yr} / 1,000) = 147,168 \text{ kcf/yr} / 1,123,273 \text{ sqft} = 0.139 \text{ kcf/size/yr}$, cf was provided in an email from HBG Design on July 11, 2017 and the sqft is provided in the DEIS, Section 2, Table 2-1.

Table 5 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	Default	Level 3
Scrapers	No Change	Default	No Change

Table 6 – Water Use

Land Use Type	Indoor Water Demand (gallons per year)	Outdoor Water Demand (gallons per year)
Hotel	17,178,053	891,479
Casino	33,042,489	1,714,786
Events Center	11,317,305	587,327
Conference Center	4,698,703	243,846
Outdoor Sports Retail	10,559,450	547,997
Total	76,796,000	3,985,435

Notes: Based on Redding Rancheria Wastewater Management and Drinking Water Feasibility Study. Outdoor water demand based on Table 4 (landscape irrigation) and distributed to land uses based on indoor water demand percentages of the total indoor water demand.

CalEEMod Mitigation Measures

- The Tribe shall use Tier 3 construction equipment, using a minimum of 90 percent of the equipment’s total horsepower.
- The Tribe shall apply soil stabilizer on unpaved roads
- The Tribe shall apply water to exposed construction areas twice a day.
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour.
- The Tribe shall use at minimum 30 percent recycled water.

CalEEMod Inputs

Redding Rancheria Fee-to-Trust and Casino Project
Alternative B

Project-Specific Inputs for the Redding Rancheria Fee-to-Trust and Casino Project

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Project Name	Project Name	Redding Rancheria FTT and Casino Project – Alternative B	Project Description
Project Location	Air Quality District/ Air Basin	Shasta County	Modeler, based on location
Climate zone	Climate Zone Number	3	Appendix F Climate Zones Lookup
Land Use Setting	Urban or Rural	Urban	Modeler, based on location
Start of Construction	Date	July 1, 2019	Project Description
Operational Year	1st year of operation after full buildout.	2025	Project Description
Utility Company	Utility Company Name	PG&E	Project is served by Redding Electrical Utility (REU) which is not included as a power provider in CalEEMod. PG&E is used in place because REU sells power into the PG&E grid and vice versa.
Land Use Type and Subtype	Residential, Commercial, Recreation, etc.	See Table 1.	See Table 1.
Unit Amount	Size of Buildings or Number of units for each Land Use Type.	See Table 1.	See Table 1.
Lot Acreage	Acreage of each Land Use Type	See Table 1.	See Table 1.
Population	Population based on persons/household	0	No residential units are proposed therefore not population is associated with Alternative B.
Construction Phases	Type of construction phase (Demo, Site Prep, etc.) and beginning and ending dates	Alt B- 18 Months starting 6/1/2019	Project Description
Off-Road Equipment	Type of equipment (Excavator, Dozer, etc.) and number of units per construction phase	See Table 2.	See Table 2.
Dust From Material Movement	Export/Import of Material (Tons or Cubic Yards)	0	Section 2 of the EIS
Demolition	Sq ft or tons of Demo	N/A	--
Construction Trip Gen Rate	Average number of one-way trips per day	--	--
Operational Trip Reductions	% reduction in trips.	See Table 3.	2018 KH Traffic Impact Analysis.

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Operational Trip Gen Rate and trip length	Trips and trip lengths	See Tables 3.	See Tables 3.
Area Sources	Hearths – # of wood-burning fireplaces, #of gas fireplaces, and # of units with no fireplace.	Not Applicable	No hearths are included in the project design.
	Landscape Equipment - % of equipment that is electric.	--	--
Energy Use	Project Specific Emission Factors.	See Table 4.	See Table 4.
Water and Wastewater	Indoor and outdoor water use for each Land Use Subtype in gallons per year.	See Table 6.	Water and Wastewater Feasibility Study Table 4
Solid waste	Tons of solid waste generated per year	1,234	CalRecycle, 2017
	Land Fill Gas Capture Rate	94%	CARB Mandatory Reporting Regulation Guidance
Operational off-road equipment	Excavator, Dozer, etc.	--	--
Stationary Sources	Emergency Generators/Fire Pumps	3 - 2,923 Horsepower	Estimate from like projects
	Generators/Fire Pumps EF	Default	Default
	Process Boilers	3 - 0.5 MMBtu/hr	Estimate from like projects
	Boilers EF	Default	Default
	User Defined	--	--
Land Use Change	Vegetation land use type (cropland, etc.) and initial and final acreage	Grassland Initial: 232 Acres Final: 158	Project Description
Sequestration	Type and net number of new trees added	--	--

Table 1 – Land Use Inputs Alternative B

Land Use Type	Land Use Subtype	Unit Amount	Size Metric	Lot Acreage	Square Feet	Population
User Defined	Casino	150.326	1,000 sq. ft.	3.39	150,326	0
Recreation	Movie Theater (Event Center and outdoor amphitheater)	3,300	seats	1.62	72,000	0
Recreation	Arena (Conference Center)	10.08	1,000 sq. ft.	0.23	10,080	0
Recreational	Hotel	250	rooms	3.99	177,367	0
Parking	Enclosed Parking Structure	1,650	spaces	13.14	583,500	0
Parking/Water/Wastewater	Parking Lot	600	spaces	51.82	--	0
Total				74.196	993,273	0

Notes: Population based on daily trips provided by Kimley-Horn. Event center includes 1,800 seats from the Event Center and 1,500 seats from the Outdoor Amphitheatre.

Source: Table 2-1, Section 2 of the EIS.

Table 2 – Construction Equipment Usage

Equipment	Total No.	Construction Phase Activities				
		Site Preparation	Grading	Construction	Paving	Architectural Coating
	Construction Phasing	7/1/2019 - 8/31/2019	9/1/2019 - 11/30/2019	12/1/2019 - 12/15/2020	5/1/2020 - 8/15/2020	3/15/2020 - 12/31/2020
All Equipment	Default	Default	Default	Default	Default	Default
Worker Trips (one-way trips)	--	Default	Default	Default	Default	Default

Source: CalEEMod defaults used for equipment and phase time proportion. Total time from Project Description.

Table 3 – Trip Generation Rates

Land Use	Daily Trip Generation Rate		Trip Length (Miles)			Trip Percent			Primary Trip	Diverted
	Weekday (/size/day)	Saturday (size/day)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)		
Casino	33.67	33.67	9.50	9.50	25.00	19.0	19.4	61.6	90	10
Events Center	0.23	0.23	9.50	9.50	25.00	1.80	79.20	19.00	100	0
Convention Center	67.01	67.01	9.50	9.50	25.00	0.00	81.00	19.00	100	0
Hotel	2.04	2.04	9.50	9.50	25.00	19.40	61.60	19.00	100	0

Notes: Event and convention center 30 percent trip generation reduction implemented because facilities are anticipated to operate less than 256 days per year.
 Source: Kimley-Horn TIS, 2018.

Table 4 – Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)
All Land Uses	--	12.174	--	--	0.116

Notes: All other land uses utilize default energy.
 Electricity energy use is determined by the following equation: $15,465,000 \text{ kwh/yr} / 993,273 \text{ sqft} = 14.601 \text{ kwh/size/yr}$. Kwh/yr was provided in an email from HBG Design on July 10, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.
 Natural gas use is determined by the following equation: $(16,800 \text{ cf per hour} * 8,760 \text{ hours/yr} / 1,000) = 147,168 \text{ kcf/yr} / 993,273 \text{ sqft} = 0.139 \text{ kcf/size/yr}$, cf was provided in an email from HBG Design on July 11, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Table 5 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	Default	Level 3
Scrapers	No Change	Default	No Change

Table 6 – Water Use

Land Use Type	Indoor Water Demand (gallons per day)	Outdoor Water Demand (gallons per day)
Hotel	16,527,735	751,132
Casino	31,791,583	1,444,824
Events Center	10,888,860	494,863
Conference Center	4,520,822	205,457
Total	63,729,000	2,896,275

Notes: Based on Redding Rancheria Wastewater Management and Drinking Water Feasibility Study.
 Outdoor water demand based on Table 4 (landscape irrigation) and distributed to land uses based on indoor water demand percentages of the total indoor water demand.

CalEEMod Mitigation Measures

- The Tribe shall use Tier 3 construction equipment, using a minimum of 90 percent of the equipment’s total horsepower.
- The Tribe shall apply soil stabilizer on unpaved roads
- The Tribe shall apply water to exposed construction areas twice a day.
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour.
- The Tribe shall use at minimum 30 percent recycled water.

Table 3 - Trip Generation Rates

Land Use	Daily Trip Generation Rate		Trip Length (Miles)			Trip Percent			Primary Trip	Diverted
	Weekday (/size/day)	Saturday (size/day)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)		
Casino	21.26	21.26	9.50	9.50	25.00	19.00	19.40	61.60	90	10
Events Center	0.23	0.23	9.50	9.50	25.00	1.80	79.20	19.00	100	0
Convention Center	67.01	67.01	9.50	9.50	25.00	0.00	81.00	19.00	100	0
Hotel	2.04	2.04	9.50	9.50	25.00	19.40	61.60	19.00	100	0
Retail	22.52	22.52	9.50	9.50	25.00	16.30	64.70	19.00	90	10

Notes: Event and convention center 30 percent trip generation reduction implemented because facilities are anticipated to operate less than 256 days per year.

Source: Kimley-Horn TIS, 2018.

Table 4 – Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)
All Land Uses	--	13.64	--	--	0.130

Notes: All other land uses energy is input under Casino the land use.

Electricity energy use is determined by the following equation: $15,465,000 \text{ kwh/yr} / 1,113,043 \text{ sqft} = 14.601 \text{ kwh/size/yr}$. Kwh/yr was provided in an email from HBG Design on July 10, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Natural gas use is determined by the following equation: $(16,800 \text{ cf per hour} * 8,760 \text{ hours/yr} / 1,000) = 147,168 \text{ kcf/yr} / 1,113,043 \text{ sqft} = 0.139 \text{ kcf/size/yr}$, cf was provided in an email from HBG Design on July 11, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Table 5 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	Default	Level 3
Scrapers	No Change	Default	No Change

Table 6 – Water Use

Land Use Type	Indoor Water Demand (gallons per day)	Outdoor Water Demand (gallons per day)
Casino	17,823,049	938,402
Conference Center	1,391,660	73,272
Events Center	9,940,428	523,374
Hotel	26,006,368	1,369,262
Retail	17,947,995	944,980
Total	73,109,500	3,849,290

Notes: Based on Redding Rancheria Wastewater Management and Drinking Water Feasibility Study.
Outdoor water demand based on Table 4 (landscape irrigation) and distributed to land uses based on indoor water demand percentages of the total indoor water demand.

CalEEMod Mitigation Measures

- The Tribe shall use Tier 3 construction equipment, using a minimum of 90 percent of the equipment's total horsepower.
- The Tribe shall apply soil stabilizer on unpaved roads
- The Tribe shall apply water to exposed construction areas twice a day. 11
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour.
- The Tribe shall use at minimum 30 percent recycled water.

Source: CalEEMod defaults used for equipment and phase time proportion. Total time from Project Description.

Table 3 – Trip Generation Rates

Land Use	Daily Trip Generation Rate		Trip Length (Miles)			Trip Percent			Primary Trip	Diverted
	Weekday (/size/day)	Saturday (size/day)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)	Work Trips (C-W)	Work to Project Trips (C-C)	Home to Project Trips (C-NW)		
Regional Shopping Center	22.52	22.52	9.50	9.50	25.00	16.30	64.70	19.00	85	15
High Turnover Restaurant	98.21	98.21	9.50	9.50	25.00	8.50	72.50	19.00	85	15
Quality Restaurant	58.24	58.24	9.50	9.50	25.00	12.00	69.00	19.00	85	15
Hotel	8.17	8.17	9.50	9.50	25.00	19.40	61.60	19.00	85	15

Table 4 – Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)
All Land Uses	--	2.88	--	--	0.0274

Notes: All other land uses utilize default energy.

Electricity energy use is determined by the following equation: $15,465,000 \text{ kwh/yr} / 234,656 \text{ sqft} = 14.601 \text{ kwh/size/yr}$. Kwh/yr was provided in an email from HBG Design on July 10, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Natural gas use is determined by the following equation: $(16,800 \text{ cf per hour} * 8,760 \text{ hours/yr} / 1,000) = 147,168 \text{ kcf/yr} / 234,656 \text{ sqft} = 0.139 \text{ kcf/size/yr}$, cf was provided in an email from HBG Design on July 11, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Table 5 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	Default	Level 3
Scrapers	No Change	Default	No Change

Table 6 – Water Use

Land Use Type	Indoor Water Demand (gallons per day)	Outdoor Water Demand (gallons per day)
Hotel	10,038,311	702,406
Quality Restaurant	3,454,360	241,710
High Turnover Restaurant	6,908,720	483,421
Outdoor Sports Retail	6,170,609	431,773
Total	26,572,000	1,859,310

CalEEMod Mitigation Measures

- The Tribe shall use Tier 3 construction equipment, using a minimum of 90 percent of the equipment's total horsepower.
- The Tribe shall apply soil stabilizer on unpaved roads
- The Tribe shall apply water to exposed construction areas twice a day.
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour.
- The Tribe shall use at minimum 30 percent recycled water.

Hotel	2.04	2.04	9.50	9.50	25.00	19.40	61.60	19.00	100	0
Retail	22.52	22.52	9.50	9.50	25.00	16.30	64.70	19.00	90	10

Table 4 - Energy Use

Land Use Subtype	Title-24 Electricity Energy Intensity (KWhr/size/yr)	Nontitle-24 Electricity Energy Intensity (KWhr/size/yr)	Lighting Energy Intensity (KWhr/size/yr)	Title-24 Natural Gas Intensity (KBtu/size/yr)	Non-title-24 Natural Gas Intensity (KBtu/size/yr)
Casino	--	13.58	--	--	0.129

Notes: All other land uses utilize default energy.

Electricity energy use is determined by the following equation: $15,465,000 \text{ kwh/yr} / 1,107,773 \text{ sqft} = 14.601 \text{ kwh/size/yr}$. Kwh/yr was provided in an email from HBG Design on July 10, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Natural gas use is determined by the following equation: $(16,800 \text{ cf per hour} * 8,760 \text{ hours/yr} / 1,000) = 147,168 \text{ kcf/yr} / 1,107,773 \text{ sqft} = 0.139 \text{ kcf/size/yr}$, cf was provided in an email from HBG Design on July 11, 2017 and the sqft is provide in the DEIS, Section 2, Table 2-1.

Table 5 – Off-Road Equipment Mitigation Inputs

Equipment Type	Engine Tier	Number of Equipment Mitigated	Diesel Particulate Filter (DPF) Level 2014
All Equipment	Tier 3	Default	Level 3
Scrapers	No Change	Default	No Change

Table 6 – Water Use

Land Use Type	Indoor Water Demand (gallons per year)	Outdoor Water Demand (gallons per year)
Hotel	16,639,197	841,839
Casino	32,005,985	1,619,302
Events Center	10,962,295	554,623
Convention Center	4,551,310	230,268
Outdoor Sports Retail	10,228,213	517,483
Total	74,387,000	3,763,515

Notes: Based on Redding Rancheria Wastewater Management and Drinking Water Feasibility Study.
 Outdoor water demand based on Table 4 (landscape irrigation) and distributed to land uses based on indoor water demand percentages of the total indoor water demand.
 Outdoor water demand based on Table 4 (landscape irrigation) and distributed to land uses based on indoor water demand percentages of the total indoor water demand.

CalEEMod Mitigation Measures

- The Tribe shall use Tier 3 construction equipment, using a minimum of 90 percent of the equipment’s total horsepower.
- The Tribe shall apply soil stabilizer on unpaved roads
- The Tribe shall apply water to exposed construction areas twice a day.
- The Tribe shall restrict vehicle speeds on the construction site to 15 miles per hour.
- The Tribe shall use at minimum 30 percent recycled water.

CalEEMod Inputs

Redding Rancheria Fee-to-Trust and Casino Project
Alternative F

Project-Specific Inputs for the Redding Rancheria Fee-to-Trust and Casino Project

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Project Name	Project Name	Redding Rancheria Fee-to-Trust and Casino Project – Alternative E	Project Description
Project Location	Air Quality District/ Air Basin	Shasta County	Modeler, based on location
Climate zone	Climate Zone Number	3	Appendix F Climate Zones Lookup
Land Use Setting	Urban or Rural	Urban	Modeler, based on location
Start of Construction	Date	July 1, 2019	Project Description
Operational Year	1st year of operation after full buildout.	2025	Project Description
Utility Company	Utility Company Name	PG&E	Project is served by Redding Electrical Utility (REU) which is not included as a power provider in CalEEMod. PG&E is used in place because REU sells power into the PG&E grid and vice versa.
Land Use Type and Subtype	Residential, Commercial, Recreation, etc.	See Table 1.	See Table 1.
Unit Amount	Size of Buildings or Number of units for each Land Use Type.	See Table 1.	See Table 1.
Lot Acreage	Acreage of each Land Use Type	See Table 1.	See Table 1.
Population	Population based on persons/household	0	No residential units are proposed therefore not population is associated with Alternative E.
Construction Phases	Type of construction phase (Demo, Site Prep, etc.) and beginning and ending dates	--	--
Off-Road Equipment	Type of equipment (Excavator, Dozer, etc.) and number of units per construction phase	--	--
Demolition	Sq ft or tons of Demo	N/A	--
Construction Trip Gen Rate	Average number of one-way trips per day	--	--
Operational Trip Reductions	% reduction in trips.	See Table 2.	2017 KH Traffic Impact Analysis.
Operational Trip Gen Rate and trip length	Trips and trip lengths	See Table 2.	See Tables 2.

Input	Type of Input	Project Specific Inputs	
		Inputs	Source/Notes
Area Sources	Hearths – # of wood-burning fireplaces, #of gas fireplaces, and # of units with no fireplace.	Not Applicable	No hearths are included in the project design.
	Landscape Equipment - % of equipment that is electric.	--	--
Energy Use	Project Specific Emission Factors.	See Table 4.	See Table 4.
Water and Wastewater	Indoor and outdoor water use for each Land Use Subtype in gallons per year.	See Table 6.	Water and Wastewater Feasibility Study Table 4
Solid waste	Tons of solid waste generated per year	58	CalRecycle, 2017
	Land Fill Gas Capture Rate	94%	CARB Mandatory Reporting Regulation Guidance
Operational off-road equipment	Excavator, Dozer, etc.	--	--
Land Use Change	Vegetation land use type (cropland, etc.) and initial and final acreage	--	--
Sequestration	Type and net number of new trees added	--	--

3.1 Mitigation Measures Construction

Redding Rancheria FTT and Casino Project – Alternative A - Shasta County, Summer

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

	ROG	NOx	CO	SO2	Fugitive PM10	Exhaust PM10	PM10 Total	Fugitive PM2.5	Exhaust PM2.5	PM2.5 Total	Bio- CO2	NBio- CO2	Total CO2	CH4	N2O	CO2e

3.1 Mitigation Measures Construction

Redding Rancheria FTT and Casino Project – Alternative A - Shasta County, Winter

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Redding Rancheria FTT and Casino Project – Alternative B - Shasta County, Summer

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Redding Rancheria FTT and Casino Project – Alternative B - Shasta County, Winter

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Redding Rancheria Fee-to-Trust and Gaming Project - Alternative C - Shasta County, Summer

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

	ROG	NOx	CO	SO2	Fugitive PM10	Exhaust PM10	PM10 Total	Fugitive PM2.5	Exhaust PM2.5	PM2.5 Total	Bio- CO2	NBio- CO2	Total CO2	CH4	N2O	CO2e

3.1 Mitigation Measures Construction

Redding Rancheria Fee-to-Trust and Gaming Project - Alternative C - Shasta County, Winter

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	200.00	Space	25.59	80,000.00	0
High Turnover (Sit Down Restaurant)	4.87	1000sqft	0.31	4,867.00	0
Hotel	128.00	Room	6.83	185,856.00	0
Quality Restaurant	3.25	1000sqft	0.21	3,245.00	0
Regional Shopping Center	120.00	1000sqft	7.69	120,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.7	Precipitation Freq (Days)	82
Climate Zone	3			Operational Year	2025
Utility Company	Pacific Gas & Electric Company				
CO2 Intensity (lb/MW hr)	641.35	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Redding Rancheria Fee-to-Trust and Casino Project – Alternative D - Shasta County, Summer

Project Characteristics - project description

Land Use - Refer to CalEEMod tables

Construction Phase - Refer to CalEEMod in Appendix Q of the EIS.

Off-road Equipment -

Off-road Equipment -

Off-road Equipment -

Architectural Coating - Refer to CalEEMod in Appendix Q of the EIS.

Vehicle Trips - Refer to CalEEMod in Appendix Q of the EIS.

Area Coating - Refer to CalEEMod Table in Appendix Q of the EIS.

Energy Use - Refer to CalEEMod Table in Appendix Q of the EIS.

Water And Wastewater - Refer to CalEEMod Table in Appendix Q of the EIS.

Solid Waste - Refer to CalEEMod Table in Appendix Q of the EIS.

Land Use Change -

Construction Off-road Equipment Mitigation - Refer to CalEEMod Table in Appendix Q of the EIS.

Area Mitigation -

Water Mitigation -

Operational Off-Road Equipment - N/A

Stationary Sources - Emergency Generators and Fire Pumps -

Stationary Sources - Process Boilers -

3.1 Mitigation Measures Construction

Redding Rancheria Fee-to-Trust and Casino Project – Alternative D - Shasta County, Summer

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Redding Rancheria Fee-to-Trust and Casino Project – Alternative D - Shasta County, Winter

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Redding Rancheria FTT and Casino Project – Alternative E - Shasta County, Summer

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

3.1 Mitigation Measures Construction

Redding Rancheria FTT and Casino Project – Alternative E - Shasta County, Winter

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

Redding Rancheria FTT and Casino Project – Alternative F - Shasta County, Annual

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

Redding Rancheria FTT and Casino Project – Alternative F - Shasta County, Winter

3.1 Mitigation Measures Construction

Use Cleaner Engines for Construction Equipment

Use DPF for Construction Equipment

Use Soil Stabilizer

Water Exposed Area

Reduce Vehicle Speed on Unpaved Roads

Clean Paved Roads

3.2 Site Preparation - 2019

Unmitigated Construction On-Site

CO HOT SPOTS ANALYSIS CALCULATION TABLES

Simplified Caline4 Carbon Monoxide Analysis

Project Title

Redding Rancheria

Background Information

Nearest Air Monitoring Station measuring CO:	984 East Ave, Ste 4, Chico, CA 95926*
Background 1-hour CO Concentration (ppm):	2.4
Background 8-hour CO Concentration (ppm):	1.45
Persistence Factor:	0.7
Analysis Year:	2020/2035

**This is the closest air monitoring site for CO to the proposed project site. Background 1-hour CO Concentrations were determined from Sacramento Valley Air Basin yearly maximum values as this data cannot be acquired from the Chico Air Monitoring Site*

Project Title: Redding Rancheria

Background Information

Nearest Air Monitoring Station measuring CO: 984 East Ave, Ste 4, Chico, CA 95926
 Background 1-hour CO Concentration (ppm):¹ 2.40
 Background 8-hour CO Concentration (ppm):² 1.45
 Persistence Factor:³ 0.7
 Analysis Year: 2020

¹ Second highest concentration recorded during the last two years per CO Protocol (for Sacramento Valley Basin)

² Ambient average 8-hour CO concentration in the U.S. in 2013; EPA's ROE, 2013
 0.7 Urban Locations

Roadway Data

Intersection: S Bonnyview Rd @ Bechelli Ln
 Analysis Condition: Proposed Project (Alt. A) with North Access Alternative (Option 1)

	Roadway Type	No. of Lanes	Average Speed

EXECUTIVE SUMMARY TABLE

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
SECTION 4.2. Geology and Soils	SECTION 5.2. Geology and Soils Mitigation							
Site Topography – The project alternatives could result in changes to site topography from grading activities	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Soils and Geology – Construction and grading activities could cause soil erosion and alterations of site topography	<p>The following Best Management Practices (BMPs) shall be implemented for Alternatives A through F:</p> <p>Mitigation Measure 5.2(A): The Tribe shall comply with the National Pollutant Discharge Elimination System (NPDES) General Construction Permit from the United States Environmental Protection Agency (USEPA) for off-site infrastructure improvements, for construction site runoff during the construction phase in compliance with the Clean Water Act (CWA). A Stormwater Pollution Prevention Plan (SWPPP) shall be prepared, implemented, and maintained throughout the construction phase of the development, consistent with Construction General Permit requirements. The SWPPP shall detail the BMPs to be implemented during construction and post-construction operation of the selected project alternative to reduce impacts related to soil erosion and water quality. The BMPs shall include, but are not limited to, the following:</p> <ol style="list-style-type: none"> Existing vegetation shall be retained where practicable. To the extent feasible, grading activities shall be limited to the immediate area required for construction and remediation. Temporary erosion control measures (such as silt fences, fiber rolls, vegetated swales, a velocity dissipation structure, staked straw bales, temporary re-vegetation, rock bag dams, erosion control blankets, and sediment traps) shall be employed for disturbed areas. To the maximum extent feasible, no disturbed surfaces shall be left without erosion control measures in place. Construction activities shall be scheduled to minimize land disturbance during peak runoff periods. Soil conservation practices shall be completed during the fall or late winter to reduce erosion during spring runoff. 	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

	<ol style="list-style-type: none"> 5. Creating construction zones and grading only one area or part of a construction zone at a time shall minimize exposed areas. If practicable during the wet season, grading on a particular zone shall be delayed until protective cover is restored on the previously graded zone. 6. Disturbed areas shall be re-vegetated following construction activities. 7. Construction area entrances and exits shall be stabilized with large-diameter rock. 8. Sediment shall be retained on site by a system of sediment basins, traps, or other appropriate measures. 9. A spill prevention and countermeasure plan shall be developed which identifies proper storage, collection, and disposal measures for potential pollutants (such as fuel, fertilizers, pesticides, etc.) used on site. 10. Petroleum products shall be stored, handled, used, and disposed of properly in accordance with provisions of the CWA (33 United States Code [USC] §§1251 to 1387). 11. Construction materials, including topsoil and chemicals, shall be stored, covered, and isolated to prevent runoff losses and contamination of surface and groundwater. 12. Fuel and vehicle maintenance areas shall be established away from all drainage courses and designed to control runoff. 13. Sanitary facilities shall be provided for construction workers. 14. Disposal facilities shall be provided for soil wastes, including excess asphalt during construction and demolition. 15. Other potential BMPs include use of wheel wash or rumble strips and sweeping of paved surfaces to remove any and all tracked soil. <p>Mitigation Measure 5.2(B): Contractors involved in the project shall be trained on the potential environmental damage resulting from soil erosion prior to construction in a</p>							

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
	pre-construction meeting. Copies of the project's SWPPP shall be distributed at that time. Construction bid packages, contracts, plans, and specifications shall contain language that requires adherence to the SWPPP. Mitigation Measure 5.2(C): In order to prevent damage to concrete and steel from corrosive soils, construction will utilize non-corrosive materials and protective coatings for buried facilities.							
Seismicity – Construction near an active fault zone could yield adverse effects associated with seismic activity	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Volcanic Hazard – Construction near an active volcano could endanger infrastructure	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Mineral Resources – Development and operation of the alternatives could disturb mineral resources	No mitigation required	LS	LS	LS	LS	LS	LS	NI
SECTION 4.3. Water Resources	SECTION 5.3. Water Resources Mitigation							
Surface Water – Impacts related to surface water could include:								
1) Flooding – Development within a floodplain could generate adverse effects related to inundation	Implement Mitigation Measures 5.5(R) through 5.5(U) . The following measure shall be implemented for Alternative E: Mitigation Measure 5.3(A): Prior to construction of Alternative E, the Tribe shall file a "Letter of Map Revision – Fill" with Federal Emergency Management Agency (FEMA) that describes the portions of the existing 100-year floodplain on the Anderson Site that will be filled as a result of site grading activities.	LS/LS	LS/LS	LS/LS	LS/LS	LS/LS	LS	NI
2) Construction Impacts – Construction activities could increase the discharge of sediment and pollutants to surface waters	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	LS/LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
3) Stormwater Runoff – Project alternatives could alter stormwater quantity, quality, and/or drainage patterns	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	LS	NI
4) Sacramento River Streambank Stabilization – Project operation could contribute to erosion and sedimentation of the Sacramento River	Implement Mitigation Measures 5.5(R) through 5.5(U) .	LS/LS	LS/LS	LS/LS	LS/LS	NI	NI	NI
5) Surface Water Supply – Project operation could impact surface water supply	The use of BMPs would minimize impacts to surface water supply.	LS	LS	LS	LS	NI	LS	NI
Groundwater – The following characteristics of groundwater resources could be impacted by the project alternatives:								
1) Groundwater Supply – The project alternatives could result in the drawdown of groundwater aquifers	The use of BMPs would minimize impacts to groundwater supply.	LS	LS	LS	LS	LS	LS	NI
2) Groundwater Recharge – The project alternatives could impact groundwater recharge through the development of impervious surfaces	No mitigation required	LS	LS	LS	LS	LS	LS	NI
3) Groundwater Quality – Impacts to groundwater quality could occur as a result of:								
a) Polluted Stormwater Runoff	Implement Mitigation Measures 5.2(A) through 5.2(C)	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI
b) Irrigation with Tertiary Treated Water	No mitigation required	LS	LS	LS	LS	NI	NI	NI
c) Application of Treated Effluent to the Leach Field Complex	No mitigation required	LS	LS	LS	LS	NI	NI	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
SECTION 4.4. Air Quality	SECTION 5.4. Air Quality Mitigation							
Construction Emissions – Construction activities could adversely affect air quality through the emission of particulate matter less than 10 microns in diameter (PM ₁₀), nitrogen oxides (NO _x), sulfur dioxide (SO ₂), carbon monoxide (CO), reactive organic gases (ROG), greenhouse gases (GHGs), and hazardous air pollutants (HAPs; primarily in the form of diesel particulate matter [DPM])	The use of BMPs would minimize impacts to air quality caused by construction emissions.	LS	LS	LS	LS	LS	LS	NI
Operational Vehicle and Area Emissions – Project alternatives could adversely affect air quality through the emission of criteria pollutants from vehicles and project facilities	The use of BMPs would minimize impacts to air quality caused by operational vehicle and area emissions.	LS	LS	LS	LS	LS	LS	NI
SECTION 4.5. Biological Resources	SECTION 5.5. Biological Resources Mitigation							
Potential Effects to Habitats – Development of project alternatives could disturb federally-designated critical or sensitive habitats	Implement Mitigation Measures 5.2(A) through 5.2(C) .	LS/LS	LS/LS	LS/LS	LS/LS	LS	LS	NI
Potential Effects to Federally Listed or Protected Special-Status Species – The following special-status species could be impacted by the project alternatives:								
1) Valley Elderberry Longhorn Beetle (VELB)	The following mitigation measures, consistent with United States Fish and Wildlife Service (USFWS) Framework, shall be implemented for Alternatives A through D prior to commencement of construction activities occurring within 50 meters of Valley Elderberry Longhorn Beetle (VELB) the elderberry shrub: Mitigation Measure 5.5(A): The elderberry shrub along the northwest corner of the Strawberry Fields Site along the	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
	<p>Sacramento River shall be fenced or flagged for avoidance. Construction activities potentially impacting the shrub (e.g. trenching) shall apply a buffer of at least 6 meters (approximately 20 feet) from the drip-line. To the degree feasible, activities occurring within 50 meters (165 feet) of an elderberry shrub shall be limited to the season when VELB are not active (August to February).</p> <p>Mitigation Measure 5.5(B): Should mechanical weed removal occur within the drip-line of the elderberry shrub, it shall be limited to the season when adults are not active (August to February) and shall avoid damaging the elderberry.</p> <p>Mitigation Measure 5.5(C): Construction staging areas shall be located a minimum of 30 feet away from the elderberry shrub. Temporary stockpiling of excavated or imported material shall occur in approved construction staging areas. Excess excavated soil shall be used on site or disposed of at a regional landfill or other appropriate facility.</p> <p>Mitigation Measure 5.5(D): A qualified biologist shall provide training for construction personnel. Training shall include the status of the VELB, its host plant and habitat, the need to avoid damaging the elderberry shrub, and the possible penalties for noncompliance.</p> <p>Mitigation Measure 5.5(E): Herbicides shall not be used within the drip-line of the shrub. Insecticides shall not be used within 30 meters (98 feet) of the elderberry shrub. Chemicals shall be applied using a backpack sprayer or similar direct application method.</p> <p>Mitigation Measure 5.5(F): A qualified biologist shall monitor the work area at project-appropriate intervals to assure avoidance and conservation measures are being implemented. The amount and duration of monitoring depend on project specifics and shall be discussed with USFWS.</p> <p>Mitigation Measure 5.5(G): Should removal of the elderberry shrub be necessary as part of future bank stabilization measures, the shrub will be relocated following USFWS protocols (USFWS, 1999) to suitable riparian habitat approximately 1,800 feet southwest of its original location, as</p>							

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G	
	approved by USFWS. Additionally, two credits will be purchased from a USFWS-approved conservation bank. After relocation, monitoring and annual reporting will occur for five years. Additional mitigation may be required pursuant to consultation with USFWS.								
2) California Red-legged Frog (CRLF)	<p>The following mitigation measures shall be implemented for Alternatives A through E:</p> <p>Mitigation Measure 5.5(K): A qualified biologist will conduct a preconstruction habitat assessment survey for California red legged frogs (CRLFs) following Appendix D of USFWS (2005) <i>Revised Guidance of Site Assessments and Field Surveys for the California Red-legged Frog</i>. The survey shall be conducted no less than 14 days and no more than 30 days prior to the beginning of ground disturbance, construction activities, and/or any project activity likely to impact the CRLF. The survey will be conducted in all potential CRLF habitat on and within 200 feet of the Action Area. If CRLF is detected within or immediately adjacent to the Action Area, the USFWS shall be contacted immediately to determine the best course of action.</p> <p>Mitigation Measure 5.5(L): Should CRLF be identified during surveys, additional silt fencing will be installed after surveys have been completed to further protect this species from construction impacts, should it be present. The fencing shall remain in place until construction activities cease. If identified on site, USFWS may be contacted for additional consultation.</p> <p>Mitigation Measure 5.5(M): Prior to the start of construction, the applicant will retain a qualified biologist to conduct an informational meeting to educate all construction staff on the CRLF. This training will include a description of the CRLF and its habitat needs; an explanation of the status of the species and its protection under the FESA; and a list of the measures being taken to reduce effects to the species during project construction and implementation. The training will include a handout containing training information. The project manager will use this handout to train any additional construction</p>	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI	

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

	personnel that were not in attendance at the first meeting, prior to starting work on the project.							
3) Bald Eagle	<p>The following mitigation measures shall be implemented for Alternatives A through E:</p> <p>Mitigation Measure 5.5(I): If construction activities (e.g., building, grading, ground disturbance, removal of vegetation) are scheduled to occur during the nesting season for bald eagles (nesting season in the Pacific Northwest is from January 1 through August 15), a qualified biologist shall conduct a preconstruction nest survey for bald eagles within one-mile of the Strawberry Fields Site prior to the start of construction. If an active nest is located within one mile of construction activities, the Tribe will comply with the recommendations identified in the USFWS (2007) <i>National Bald Eagle Management Guidelines and Conservation</i> to avoid disturbing nesting bald eagles and their young. If the active nest is visible from the Strawberry Fields Site, recommendations include maintaining a buffer of at least 660 feet between construction activities and the nest, restricting all clearing, external construction, and landscaping activities within 660 feet of the nest until the nesting season is over and maintaining and establishing landscape buffers. If the active nest is not visible from the Strawberry Fields Site recommendations include maintaining a buffer of at least 660 feet between construction activities and the nest and maintaining and establishing landscape buffers. Implementation of the mitigation discussed in Section 5.5.2 will further reduce potential adverse effects to bald eagles.</p> <p>The following mitigation measures shall be implemented for Alternatives A through F: Implement Mitigation Measures 5.5(O) through 5.5(Q), described below.</p>	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI
Potential Effects to Special-Status Fish Species – Special-status fish species could be impacted by the project alternatives	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
Potential Effects to State Listed Special-Status Species – The following special-status species could be impacted by the project alternatives:								
1) Western Red Bat	The following mitigation measures shall be implemented for Alternative E: Mitigation Measure 5.5(N): A qualified biologist shall conduct a habitat assessment of the oak woodland habitat within the Anderson Site no more than three days prior to the start of construction occurring within 100 feet of the oak woodland. If the habitat assessment reveals suitable tree cavities large enough to accommodate roosting bats, the qualified biologist shall conduct a sunset fly-out survey on trees with identified cavities. Should bats be detected, the identified trees shall be flagged and buffered by 100 feet. Should the avoidance of identified bat-roosting trees not be feasible, replacement of suitable bat roosting habitat shall occur at a 1:1 ratio elsewhere on the Anderson Site outside of clearing limits. Replacement habitat may consist of bat boxes or similar structures. A qualified biologist shall determine bat box placement and a 100-foot avoidance buffer will be placed around each box. Trees identified to contain roosting bats that are proposed for removal shall be removed as late in the day as possible to reduce the likelihood of potential bat mortality. On the first day, remaining limbs may be removed as late in the day as possible. This amount of disturbance should cause roosting bats to seek other roosting habitat. The rest of the tree can then be harvested on the afternoon of the second day. A qualified biologist shall be present for the removal of these trees in the event that bats are found to have been roosting.	NI	NI	NI	NI	PS/LS	NI	NI
2) Western Spadefoot Toad	The following mitigation measures shall be implemented for Alternatives A through E: Mitigation Measure 5.5(J): A qualified biologist will conduct a preconstruction survey of the potential upland grassland habitat for western spadefoot toad. Mitigation discussed in Section 5.5.3 will be implemented to protect potential	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI

	breeding habitat. Additional silt fencing will be installed after surveys have been completed to further protect this species from construction impacts, should it be present. The fencing shall remain in place until all construction activities on the site have been completed.							
	The following measures shall be implemented for Alternatives A through D: Implement Mitigation Measures 5.5(R) through 5.5(U) , described below.							
3) Red Bluff Dwarf Rush	The following mitigation measures shall be implemented for Alternatives A through E: Mitigation Measure 5.5(H): A qualified botanist will conduct a preconstruction survey for Red Bluff dwarf rush within the identifiable bloom season (March through June) directly prior to construction. If the species is not identified within the area of impact, no further mitigation is required. Should the species be identified within the area of impact, a 25-foot “no construction” buffer will be established and maintained using fencing. If avoidance is not possible, impacts to identified populations of Red Bluff dwarf rush shall be offset by preserving remaining populations to the extent feasible and/or replanting at a 1:1 ratio. Transplants shall be planted in suitable areas ecologically similar to the original sites as determined by the qualified biologist. A 25-foot buffer shall be established around preserved populations and replanting sites. The qualified biologist shall place orange construction fencing around avoided and replanted populations prior to construction activities to ensure populations are protected. Final replanting density shall be consistent with what is impacted.	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
4) Tricolored Blackbird	Implement Mitigation Measures 5.5(O) through 5.2(Q) , described below.	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
5) Bank Swallow	Implement Mitigation Measures 5.5(O) through 5.2(Q) , described below.	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

Potential Effects to Migratory Birds and Other Birds of Prey – The following elements of the project alternatives could impact migratory birds:								
1) Construction Activities: Active nests could be disturbed if construction occurred during the nesting season	The following measures shall be implemented for Alternatives A through F to avoid and/or reduce impacts to any potentially nesting migratory, raptor, and/or special-status bird species: Mitigation Measure 5.5(O): If construction activities (e.g., building, grading, ground disturbance, removal of vegetation) are scheduled to occur during the nesting season (February 15-September 15), a preconstruction nesting bird survey shall be conducted by a qualified wildlife biologist throughout the areas of suitable habitat within 500 feet of proposed construction activity. The surveys shall occur no more than 14 days prior to the scheduled onset of construction. If construction is delayed or halted for more than 14 days, another preconstruction survey for nesting bird species shall be conducted. If no nesting birds are detected during the preconstruction survey, no additional surveys or mitigation measures are required. Mitigation Measure 5.5(P): If nesting bird species are observed within 500 feet of construction areas during the surveys, appropriate “no construction” buffers shall be established. The size and scale of nesting bird buffers shall be determined by a qualified biologist and shall be dependent upon the species observed and the location of the nest. Buffers shall be established around active nest locations. The nesting bird buffers shall be completely avoided during construction activities. The qualified biologist shall also determine an appropriate monitoring plan and decide whether construction monitoring is necessary during construction activities. Monitoring requirements are dependent upon the species observed, the location of the nests, and the number of nests observed. The buffers may be removed when the qualified wildlife biologist confirms that the nest(s) is no longer occupied and all birds have fledged.	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI

		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
	Mitigation Measure 5.5(Q): If impacts (i.e., take) to migratory nesting bird species are unavoidable, consultation with USFWS shall be initiated. Through consultation, an appropriate and acceptable course of action shall be established.							
2) Lighting: Lighting could increase collisions of birds with structures or cause avian disorientation	The incorporation of design features would minimize impacts to birds caused by lighting	LS	LS	LS	LS	LS	LS	NI
Potential Effects to Wetlands and Waters of the U.S. – Construction could impact wetlands within project site and improvement area boundaries	Implement Mitigation Measures 5.2(A) through 5.2(C) . The following measures shall be implemented for Alternatives A through D to minimize or avoid potential impacts to wetlands and Waters of the U.S.: Mitigation Measure 5.5(R): Prior to the start of construction, wetlands and jurisdictional features shall be fenced, and excluded from activity. Fencing shall be located as far as feasible from the edge of wetlands and riparian habitats and installed prior to the dry season, after special-status species surveys have been conducted and prior to construction. The fencing shall remain in place until all construction activities on the site have been completed. 1. Construction activities within 50 feet of any United States Army Corps of Engineers (USACE) jurisdictional features identified in the formal delineation process shall be conducted during the dry season to minimize erosion. 2. Staging areas shall be located away from the areas of wetland habitat that are fenced off. Temporary stockpiling of excavated or imported material shall occur only in approved construction staging areas. Excess excavated soil shall be used on site or disposed of at a regional landfill or other appropriate facility. Stockpiles that are to remain on the site through the wet season shall be protected to prevent erosion (e.g. with tarps, silt fences, or straw bales). 3. Standard precautions shall be employed by the construction contractor to prevent the accidental release	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI

	<p>treatment as is recommended by the archaeologist after consultation with the State Historic Preservation Officer (SHPO) and, if the find is prehistoric, the Native American Heritage Commission (NAHC). If unknown resources are encountered during construction, recommendations, including the management recommendations listed in Mitigation Measures 5.6(A) and 5.6(B), shall be implemented to ensure that the resources are avoided, protected, and/or recorded.</p> <p>The following mitigation measure shall be implemented for Alternatives A through D:</p> <p>Mitigation Measure 5.6(D): Prior to construction of the northern access improvements along Bechelli Lane, the BIA shall consult with the SHPO to develop an appropriate mitigation plan to address the potential for adverse effects to CA-SHA-266, an NRHP-eligible site that would be impacted by construction. Section 106 of the NHPA requires that these effects be resolved in a Memorandum of Agreement, Programmatic Agreement, or by incorporation of a description of its binding commitment to measures to avoid, minimize, or mitigate adverse effects to historic properties in the Record of Decision. It is anticipated that such measures would include development and implementation of archaeological and burial treatment plans.</p> <p>The archaeological and burial treatment plans shall include details regarding the method and timing of the investigation of the North Access Improvement Area Area of Potential Effects (APE), data collection and analysis methodology, burial recordation and analysis methodology, decision points, artifact and burial storage, and repatriation schedules. It is strongly recommended that the North Access Improvement Area APE be graded to subsoil or to anticipated construction impacts (whichever comes first) prior to Proposed Project construction wherever possible. This would help avoid unnecessary and potentially expensive construction delays by uncovering any features of CA-SHA-266 or other resources in advance, allowing time appropriately implement measures in accordance with the stipulations of the treatment plans.</p>

		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
	the stage shall be monitored during events and, if necessary, the volume shall be reduced to ensure that the ambient sound level in the vicinity of residential receptors remains below 67 A-weighted decibels (dBA) equivalent noise level (Leq). Performers shall be required by contract to turn down the volume at the request of the Tribe if event conditions indicate this is necessary.							
Operational Vibration – Vibration associated with operation could adversely affect human health and/or the physical environment	No mitigation required	LS	LS	LS	LS	LS	LS	NI
SECTION 4.12. Hazardous Materials	SECTION 5.12. Hazardous Materials Mitigation							
Construction – Construction of the project alternatives could disturb existing hazardous materials or introduce new hazardous materials into the environment	The use of BMPs would minimize impacts from hazardous materials during construction.	LS	LS	LS	LS	LS	LS	NI
Operation – Operation of the project alternatives could introduce hazardous materials into the physical environment	The use of BMPs would minimize impacts from hazardous materials during operation.	LS	LS	LS	LS	LS	LS	NI
SECTION 4.13. Aesthetics	SECTION 5.13. Aesthetics Mitigation							
Construction Impacts – Construction activities could obstruct views of scenic resources	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Operational Impacts – Development of the project alternatives could generate significant adverse aesthetic impacts, including those impacts addressed separately below	The incorporation of design features would minimize impacts to aesthetics during operation.	LS	LS	LS/LS	LS	LS	LS	NI
1) Effects on Viewsheds Surrounding the Project	The incorporation of design features would minimize impacts to viewsheds during operation.	LS	LS	LS	LS	LS	LS	NI
2) Shadow, Light, and Glare	The incorporation of design features would minimize impacts caused by shadow, light, and glare during operation.	LS	LS	LS	LS	LS	LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
SECTION 4.14. Indirect and Growth-Inducing Effects								
SECTION 4.14.1. Indirect Effects from Off-Site Traffic Mitigation Improvements								
Geology and Soils – Construction of roadway improvements could increase the potential for soil erosion and geological hazards	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Water Resources – Construction of roadway improvements could increase stormwater runoff and erosion and adversely impact water quality	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Air Quality – Construction of roadway improvements could adversely impact air quality through the emission of air pollutants	The use of BMPs will minimize air quality impacts caused by construction of roadway improvements.	LS	LS	LS	LS	LS	NI	NI
Biological Resources – Habitat could be lost and special-status species could be disturbed due to the construction of roadway improvements	Implement Mitigation Measures 5.2(A) through 5.2(C) and Mitigation Measure 5.5(R) through 5.5(U) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Cultural Resources – Construction of roadway improvements has the potential to disturb archaeological resources	Implement Mitigation Measures 5.6(A) through 5.6(D) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Socioeconomic Conditions – Roadway improvements could cause disturbances in traffic flow and/or the loss of access to businesses and communities	No mitigation required	LS	LS	LS	LS	LS	NI	NI
Transportation/Circulation – Roadway improvements could disrupt traffic flow and/or access to surrounding land uses	No mitigation required	LS	LS	LS	LS	LS	NI	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
Land Use – Roadway improvements could conflict with City or County planning ordinances or adversely impact adjacent property owners	No mitigation required	LS	LS	LS	LS	LS	NI	NI
Public Services – Roadway improvements could significantly disrupt the provision of public services	Implement Mitigation Measures 5.8(A) and 5.10(G) and 5.10(H) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Noise – Construction of the roadway improvements could result in significant increases in ambient noise levels	The use of BMPs will minimize impacts from construction noise from roadway improvements.	LS	LS	LS	LS	LS	NI	NI
Hazardous Materials – Hazardous materials could be released inadvertently and dry vegetation could be ignited during grading and construction activities	The use of BMPs will minimize impacts from inadvertent hazard material releases.	LS	LS	LS	LS	LS	NI	NI
Aesthetics – Roadway improvements could significantly alter viewsheds	No mitigation required	LS	LS	LS	LS	LS	NI	NI
SECTION 4.14.2. Indirect Effects from Off-Site Utility/Infrastructure Improvements								
Geology and Soils – Construction of utility improvements could increase the potential for soil erosion and geological hazards	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Water Resources – Construction of utility improvements could increase stormwater runoff and erosion and adversely impact water quality	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Air Quality – Construction of utility improvements could adversely impact air quality through the emission of air pollutants	The use of BMPs will minimize impacts to air quality from construction.	LS	LS	LS	LS	LS	NI	NI
Biological Resources – Habitat could be lost and special-status species could	Implement Mitigation Measure 5.5(R) through 5.5(U) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

be disturbed due to the construction of utility improvements								
Cultural Resources – Construction of utility improvements has the potential to disturb archaeological resources	Implement Mitigation Measures 5.6(A) through 5.6(D) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Socioeconomic Conditions – Utility improvements could cause disturbances in traffic flow and/or the loss of access to businesses and communities	No mitigation required	LS	LS	LS	LS	LS	NI	NI
Transportation/Circulation – Utility improvements could disrupt traffic flow and/or access to surrounding land uses	Implement Mitigation Measures 5.8(A) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Land Use – Utility improvements could conflict with City or County planning ordinances or adversely impact adjacent property owners	No mitigation required	LS	LS	LS	LS	LS	NI	NI
Public Services – Utility improvements could significantly disrupt the provision of public services	Implement Mitigation Measures 5.8(A), 5.10(G), and 5.10(H) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI	NI
Noise – Construction of the utility improvements could result in significant increases in ambient noise levels	The use of BMPs will minimize impacts from noise caused by construction of utility improvements.	LS	LS	LS	LS	LS	NI	NI
Hazardous Materials – Hazardous materials could be released inadvertently and dry vegetation could be ignited during grading and construction activities	The use of BMPs will minimize impacts from inadvertent hazardous material releases.	LS	LS	LS	LS	LS	NI	NI
Aesthetics – Utility improvements could significantly alter viewsheds	No mitigation required	LS	LS	LS	LS	LS	NI	NI
SECTION 4.14.3. Growth-Inducing Effects – Development of the project alternatives could promote population growth and/or the construction of additional housing, which could	No mitigation required	LS	LS	LS	LS	LS	LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
adversely impact the physical and human environments								
SECTION 4.15. Cumulative Effects								
Geology and Soils – Development of the project alternatives could, when taken together with other foreseeable developments, result in significant topographic changes and/or soil loss	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI
Water Resources								
1) Surface Water and Flooding – Development of the project alternatives in conjunction with other proposed developments could significantly increase sedimentation, pollution, and stormwater runoff	The use of BMPs would minimize cumulative impacts to surface water and flooding.	LS	LS	LS	LS	LS	LS	NI
2) Water Quality – The project alternatives, taken together with other foreseeable developments, could result in an increase in pollution and sedimentation	Implement Mitigation Measures 5.2(A) through 5.2(C) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI
3) Groundwater Supply – The project alternatives, in conjunction with the buildout of County and/or City General Plans, could significantly impact groundwater supply if the total water demand exceeds the rate of groundwater recharge	Implement Mitigation Measures 5.2(A) through 5.2(C) , and 5.3(A) .	PS/LS	PS/LS	PS/LS	PS/LS	LS/LS	LS	NI
4) Groundwater Quality – Development of the project alternatives, taken together with other foreseeable regional developments, could result in the contamination of groundwater	Implement Mitigation Measures 5.2(A) through 5.2(C) .	LS	LS	LS	LS	LS	PS/LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
Air Quality								
1) Operational Emissions – Development of the project alternatives, in conjunction with other regional projects, could contribute to the nonattainment of National Ambient Air Quality Standards (NAAQS)	The use of BMPs would minimize cumulative impacts to air quality resulting from operational emissions.	LS	LS	LS	LS	LS	LS	NI
2) Carbon Monoxide Hot Spot Analysis – Development of the project alternatives, taken together with the buildout of the City and/or County general plans, could cause an increase in delay at some intersections in the cumulative year 2040 sufficient to warrant a Hot Spot Analysis	No mitigation required	LS	LS	LS	LS	LS	LS	NI
3) Climate Change – Development of the project alternatives in conjunction with other foreseeable projects could significantly contribute to climate change through the emission of GHGs	The use of BMPs would minimize cumulative impacts related to climate change.	LS	LS	LS	LS	LS	LS	NI
Biological Resources								
1) Wildlife and Habitats – The project alternatives, in conjunction with other foreseeable developments, could adversely impact critical or sensitive habitat	No mitigation required	LS	LS	LS	LS	LS	LS	NI
2) Special-Status Species – Development of the project alternatives, taken together with the buildout of the City and	See Mitigation Measure 5.5(A) through 5.5(Q) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
County general plans, could adversely impact special-status species								
3) Migratory Birds – The project alternatives, taken together with the development of other foreseeable projects, could disturb migratory birds	See Mitigation Measures 5.5(O) through 5.5(Q)	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI
4) Wetlands and/or Waters of the U.S. – The project alternatives and other foreseeable developments could adversely impact wetlands and/or water of the U.S. by increasing erosion or through the discharge of runoff or wastewater	See Mitigation Measures 5.2(A) through 5.2(C) , and Mitigation Measure 5.5(R) through 5.5(U) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	LS	NI
Cultural Resources – Construction activities, in conjunction with the development of other foreseeable projects, could disturb archaeological or paleontological resources	See Mitigation Measure 5.6(A) through 5.6(D) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	NI
Socioeconomic Conditions – The project alternatives, taken together with the buildout of the City and County general plans, could yield adverse impacts to the local labor market, housing availability, and local governments	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Transportation								
1) 2040 Cumulative Traffic Conditions – Development of the project alternatives, taken together with the buildout of the City and County General Plans, could regional intersections to	See Mitigation Measures 5.8(S) through 5.8(JJ) in Section 5.8 .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
operate at an unacceptable level of service (LOS)								
2) Transit, Bicycle, and Pedestrian Facilities – Development of the project alternatives and other foreseeable alternatives could disrupt existing or planned transit, bicycle, and pedestrian facilities	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Land Use – Development of the project alternatives in conjunction with other development projects could disrupt or impede access to neighboring land uses	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Public Services								
1) Water Supply – Development of the project alternatives, taken together with other foreseeable developments, could adversely impact the provision of water	Implement Mitigation Measures 5.10(A) through 5.10(D) .	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	PS/LS	NI
2) Wastewater – Development of the project alternatives in conjunction with the buildout of the City and County general plans could adversely impact the treatment and disposal of wastewater	Implement Mitigation Measures 5.10(A) through 5.10(D) .	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	Option 1: PS/LS Option 2: NI	PS/LS	PS/LS	NI
3) Solid Waste – The project alternatives, taken together with other foreseeable developments, could adversely impact the disposal of solid waste	No mitigation required	LS	LS	LS	LS	LS	LS	NI
4) Law Enforcement – Development of the project	See Mitigation Measures 5.10(E) and 5.10(F) .	PS/LS	PS/LS	PS/LS	PS/LS	PS/LS	LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
alternatives and other foreseeable projects could adversely impact the provision of law enforcement services								
5) Fire Protection and Emergency Medical Services – Operation of the project alternatives, taken together with other foreseeable development projects, could impede the provision of fire protection and emergency medical services	See Mitigation Measures 5.10(G) and 5.10(H) .	LS/LS	LS/LS	LS/LS	LS/LS	LS/LS	LS/LS	NI
6) Energy and Natural Gas – Development of the project alternatives, in conjunction with the buildout of the City and County General Plans, could adversely impact the provision of electrical and natural gas services and the physical environment	No mitigation required	LS	LS	LS	LS	LS	LS	NI
Noise								
1) Traffic Noise – Development of the project alternatives could contribute to a cumulatively significant increase in traffic noise levels	No mitigation required.	LS	LS	LS	LS	LS	LS	NI
2) Vibration and Other Noise Sources – Vibration and other noise sources associated with the project alternatives, in conjunction with noise from other foreseeable projects, could contribute to a significant increase in noise levels	The use of BMPs and implementation of Mitigation Measure 5.11(A) would minimize cumulative impacts related to vibration and other noise sources.	PS/LS	LS/LS	LS/LS	LS/LS	PS/LS	PS/LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)

TABLE 1
SUMMARY OF IMPACTS AND MITIGATION MEASURES

Impact	Mitigation Measures / Best Management Practices	Original Impact / Residual Impact with Mitigation						
		Alternative A	Alternative B	Alternative C	Alternative D	Alternative E	Alternative F	Alternative G
Hazardous Materials – Development of the project alternatives, in combination with other foreseeable projects, could disturb existing hazardous materials or introduce new hazardous materials to the physical environment	The use of BMPs would minimize cumulative impacts related to hazardous materials.	LS	LS	LS	LS	LS	LS	NI
Aesthetics – The project alternatives, in combination with other foreseeable alternatives, could be visually incompatible with existing land uses or otherwise adversely impact aesthetic resources	The incorporation of design features would minimize cumulative impacts to aesthetics.	LS	LS	LS	LS	LS	LS	NI

(Legend: NI = No Impact; BI = Beneficial Impact; LS = Less-than-Significant; PS = Potentially Significant; S = Significant)
